

Website Development Class

You are invited ...

Interested in learning how to create powerful websites that not only look good, but can actually help businesses increase their internet presence?

Ketan Patel is one of the best I've talk to at SEO, online marketing, and understanding my business and how to attract clients. Because of his advice over the last couple of years, I have increased my website traffic by 33%.

The class includes:

- How to work collaboratively with clients to meet their business objectives
- Understand that website building is more than just the aesthetics—learn what makes it a profitable site and one that increases visibility
- 16 hours of work study, both in team and individual settings
- Intern opportunities (while in class), with some of the time being paid for actual client work, so you can add specific experience in your resume'
- The chance to be selected to work on one or more real client problems
- Be one of three candidates chosen to move into real paid website work after completing the course, paying \$40/hour!

This class is chock-full of information and techniques that will put you ahead of the pack. Taught by a 15 year veteran of corporate business leadership and an internationally known authority on internet business marketing and development, you will learn from the best!

Some of the projects you might be working on include a jewelry store, interior design service or several "green" websites.

Candidates for this course are those that are interested in the continually developing landscape of internet commerce, have an innate ability to understand technical thinking and a desire to build their own website development business.

Here's the scoop

• 6 month course	• 2 hour sessions every 2 weeks	• Orientation first class
• Live webinar format	• 6-8 p.m. every other Tuesday	• Class attendance mandatory

For only \$750

you can build a new career with the tools and methods you will learn in this comprehensive and fun course!
